## 1 INFORMATION FOR ORDERING ACTIVITIES

### INFORMATION FOR ORDERING ACTIVITIES APPLICABLE TO ALL SPECIAL ITEM NUMBERS

#### SPECIAL NOTICE TO AGENCIES: Small Business Participation

SBA strongly supports the participation of small business concerns in the Federal Acquisition Service. To enhance Small Business Participation SBA policy allows agencies to include in their procurement base and goals, the dollar value of orders expected to be placed against the Federal Supply Schedules, and to report accomplishments against these goals.

For orders exceeding the micropurchase threshold, FAR 8.404 requires agencies to consider the catalogs/pricelists of at least three schedule contractors or consider reasonably available information by using the GSA Advantage!™ on-line shopping service ([www.gsaadvantage.gov](http://www.gsaadvantage.gov)). The catalogs/pricelists, GSA Advantage!™ and the Federal Acquisition Service Home Page ([www.gsa.gov/fas](http://www.gsa.gov/fas)) contains information on a broad array of products and services offered by small business concerns.

This information should be used as a tool to assist ordering activities in meeting or exceeding established small business goals. It should also be used as a tool to assist in including small, small disadvantaged, and women-owned small businesses among those considered when selecting pricelists for a best value determination.

For orders exceeding the micropurchase threshold, customers are to give preference to small business concerns when two or more items at the same delivered price will satisfy their requirement.

- b.** To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508.

## **11. INVOICES**

The Contractor, upon completion of the work ordered, shall submit invoices for IT Professional services.   1. The offeror;
  2. Subcontractors; and/or
  3. Divisions, subsidiaries, or affiliates of the offeror under a common control.

## **13. RESUMES**

Resumes shall be provided to the GSA Contracting Officer or the user ordering activity upon request.

**4 TERMS AND CONDITIONS APPLICABLE TO COMMERCIAL SATELLITE COMMUNICATIONS (COMSATCOM) TRANSPONDED CAPACITY (SPECIAL ITEM NUMBER 132-54) AND COMMERCIAL SATELLITE COMMUNICATIONS (COMSATCOM) SUBSCRIPTION SERVICES (SPECIAL ITEM NUMBER 132-55)**

**1. COMSATCOM CAPACITY AND COVERAGE**

The Ordering Activity shall specify the capacity and coverage required as part of the initial requirement.

**2. INFORMATION ASSURANCE**

- a. The Ordering Activity is responsible for ensuring to the maximum extent practicable that each requirement issued is in compliance with either the Committee on National Security Systems Policy (CNSSP) 12, “National Information Assurance Policy for Space Systems used to Support National Security Missions,” or the Department of Defense Directive (DoDD) 8581.1, “Information Assurance (IA) Policy for Space Systems Used by the Department of Defense.”
- b. The Ordering Activity shall assign an impact level (per Federal Information Processing Standards Publication 200 (FIPS 200), “*Minimum Security Requirements for Federal Information and Information Systems*”) or MAC level (per DoD Instruction (DoDI) 8500.2, “*Information Assurance Implementation*) prior to issuing the initial statement of work. Evaluations shall consider the extent to which each proposed service accommodates the necessary security controls based upon the assigned impact level or MAC, command encryption/ authentication, and other requirements in CNSSP 12 or DODD 8581.1. The Contractor awarded SIN 132-54 and/or 132-55 is capable of meeting at least the minimum security requirements assigned against a low-impact information system (per FIPS 200) or Mission Assurance Category (MAC) III system (per DoDI 8500.2).
- c. The Ordering Activity reserves the right to independently evaluate, audit, and verify the IA compliance for any proposed or awarded COMSATCOM services. All IA certification, accreditation, and evaluation activities are the responsibility of the ordering activity.

**3. DELIVERY SCHEDULE**

The Ordering Activity shall specify the delivery schedule as part of the initial requirement. The Delivery Schedule options are found in *Information for Ordering Activities Applicable to All Special Item Numbers*, paragraph 6, *Delivery Schedule*.

**4. PORTABILITY**

When an Ordering Activity requires portability, this requirement shall be included as part of the initial requirement. When portability is exercised, evidence of equivalent net present value (NPV)<sup>1</sup> shall be provided by the contractor. Ordering Activities may propose additional terms and

<sup>1</sup> For example, one-year of service for a transponder valued at \$1M/year is traded for six-months of service on a transponder valued at \$2M/year.

conditions within the requirement (example: specific predefined, guaranteed terms and conditions for portability and related services). However, if the supplemental terms and conditions contradict the contract, the contract takes precedence. Portability provides the Ordering Activity the ability to relocate or “port,” COMSATCOM Services resources as user requirements change. Descriptions of portability may include moving from one transponder/satellite to another, one managed service area to another, transponded capacity redeployment between beams or transponders on a single satellite, redeployment from one frequency band to another, physical relocation of a satellite to a new orbital position, re-routing of teleport services from one teleport to another predefined teleport, re-routing of traffic from one terrestrial infrastructure to another predefined infrastructure, and movement of Network Operations Center (NOC) services from one NOC to another NOC.

## **5. FLEXIBILITY/OPTIMIZATION**

When an Ordering Activity requires re-grooming resources for spectral, operational, or price efficiencies, this requirement shall be included as part of the initial requirement. When flexibility/optimization is exercised, evidence of equivalent net present value (NPV)<sup>1</sup> shall be provided by the contractor. Ordering Activities may propose additional terms and conditions within the requirement (example: specific pre-defined, guaranteed terms and conditions for re-grooming). However, if the supplemental terms and conditions contradict the contract, the contract takes precedence. Flexibility/optimization/re-grooming allows the Contractor to redistribute resources currently used to provide COMSATCOM Services (example: space segment, network, teleport, terminal resources) or customers sharing the COMSATCOM Services resources (example: customer one with typical peak usage at 9:00 a.m. and customer two with typical peak usage at 3:30 p.m.), enabling the Ordering Activity to gain spectral, operational, and/or price efficiencies.

## **6. NET READY (INTEROPERABILITY)**

When an Ordering Activity requires interoperability, this requirement shall be included as part of the initial requirement. Interfaces may be identified as interoperable on the basis of participation in a sponsored program acceptable to the Ordering Activity. Any such access or interoperability with teleports/gateways and provisioning of enterprise service access will be defined in the individual requirement.

## **7. NETWORK MONITORING (NET OPS)**

The Ordering Activity shall specify the Network Monitoring (Net Ops) collection and delivery requirements (example: format, frequency) as part of the initial statement of work. The Contractor awarded SIN 132-54 and/or 132-55 is capable of collecting and delivering the near real-time monitoring, fault/incident/outage reporting, and information access required to ensure effective and efficient operations, performance, and availability consistent with commercial best practices. Ordering Activities may propose additional terms and conditions within the requirement (example: specific pre-defined terms and conditions for Net Ops collection and delivery.) However, if the supplemental terms and conditions contradict the contract, the contract takes precedence.

## **8. EMI/RFI IDENTIFICATION, CHARACTERIZATION, AND GEO-LOCATION**

<sup>1</sup> For example, one-year of service on a less efficient arrangement of contractor resources is traded for nine-months of services on a more efficient arrangement of contractor resources that provides an operational efficiency to the Ordering Activity’s customers.

When an Ordering Activity requires Electro Magnetic Interference (EMI) / Radio Frequency Interference (RFI) identification, characterization, and geo-location, it shall be included as part of the initial requirement. The Ordering Activity shall establish and use with the Contractor a mutually agreed upon media and voice communications capability capable of protecting “Sensitive, but Unclassified” data.

## **9. SECURITY**

The Ordering Activity is responsible for assigning the personnel and facility clearance levels for each requirement. If required, the Ordering Activity is responsible for issuing the appropriate security forms (e.g., a DD-254) for any special clearance requirements and indoctrinations, such as Sensitive Compartmented Information (SCI). Ordering Activities shall ensure the Contractor “masks” or “protects” Ordering Activity customers against unauthorized release of identifying information to any entity that could compromise the customer’s operations security. Identifying information includes but is not limited to personal user and/or unit information including tail numbers, unit names, unit numbers, individual names, individual contact numbers, street addresses, etc.

## **10. THIRD PARTY BILLING FOR COMSATCOM SUBSCRIPTION SERVICES**

The Ordering Activity shall make every effort to educate the terminal owners or operators on usage of the approved network infrastructure to avoid third party charges.

## **11. ADDITIONAL TERMS AND CONDITIONS.**

- a. The Ordering Activity is responsible for determining the number of approaches each Contractor may offer in response to a statement of work.
- b. If guidance is required, Ordering Activities may contact the GSA Satellite Communications Services Program Management Office, [satserv@gsa.gov](mailto:satserv@gsa.gov).
- c. For each Subscription Service requirement, the Ordering Activity shall negotiate with the Contractor any required Committed Information Rates (CIR). CIR is the average dedicated bandwidth data transfer rate (example: megabits per second) for an individual COMSATCOM Subscription Services network that the Contractor commits to delivering over a period of time. The Contractor may exceed the CIR if the network has capacity at any time.

## **12. CONTRACT CLAUSES.**

- a. Ordering activities will be able to view the complete list of IT Schedule 70 contract clauses, including the specific contract terms and conditions for any specific contract holder, at <http://www.gsaelibrary.gsa.gov/ElibMain/contractsOnline.do?scheduleNumber=70>

### **13. DESCRIPTION OF COMSATCOM SERVICES AND PRICING**

#### **Commercial Satellite Communications (COMSATCOM) Transponded Capacity (SIN 132-54)**

Segovia has Master Service Agreements (MSA) with Intelsat, Eutelsat, SES Americom, NewSkies, Telesat, and XTAR, which streamlines our processes for procuring and reselling C-, Ku-, and X- band transponder capacity.

Our pre-existing service agreements with multiple satellite operators allow us to provide capacity quickly, since we do not have to enter into time-consuming contract negotiations every time we procure space segment; instead we can place an order under the MSA, speeding the process significantly. Additionally, our relationships with satellite operators have allowed us to acquire space segment for emergencies in a reduced interval, with paperwork processed in parallel as opposed to in serial. Segovia has ready access to preemptible and non-preemptible space segment. By leveraging existing contractual relationships with every major commercial satellite operator, Segovia ensures the provisioning of the available transponded capacity most appropriate for the customers' requirements rather than delivering sub-optimal resources due to alignment with one operator.

We can provide pure transponded capacity (leased with no support services) as well as capacity with link budget analysis and other basic support engineering and/or training that ensures operational reliability and availability. Our customers can lease space segment by MHz (power) or by Mbps (bandwidth) on uplink and downlink throughputs. It should be noted that Mbps leasing requires support engineering to ensure throughput for the type, number, and location of terminals. MHz leasing does not require engineering and other basic support; however, we encourage our many customers to utilize support engineering services to ensure link availability and reliability.

Ideal for customers who require network infrastructure for multiple sites, the SPN provides dedicated bandwidth on a per-network basis and allows users to employ custom Quality of Service (QoS) protocols to prioritize their network traffic. The SPN is scalable, allowing rapid modification and deployment to meet evolving mission requirements.

##### **Segovia Dedicated Network (SDN)**

A complete turnkey solution, the SDN provides dedicated bandwidth, terrestrial transport, and network infrastructure. Customer-owned and designed, Segovia-built and managed, the

This service combines the Inmarsat BGAN Core IP Network with our private, global, terrestrial MPLS network. The result: guaranteed bandwidth and assured end-to-end Quality of Service for both streaming IP and background IP services. Customers may route their service either through dedicated network connections to secure sites, or direct to customer locations via dedicated point-to-point circuits.

### **Segovia Iridium Service**

The unique geometry of Iridium's low-earth orbiting (LEO) satellites provides complete global coverage, including in the extreme Polar Regions not covered by geostationary satellite systems. The LEO permits communication via compact handheld satellite phones or fixed installations with very small external antennas. Voice quality is sharp and clear, without the delays and echoes commonly experienced with higher-orbit satellite communications.

Segovia Iridium Service includes flexible postpaid or standard prepaid service plans tailored to customer requirements and applications.

Segovia has ready access to trusted global commercial satellite and terrestrial resources. Our teleports – located in the U.S., Europe, and Australia – have redundant terrestrial connectivity to our private MPLS backbone and to multiple secure and geographically diverse hosting facilities. Our net-centric, multi-layered architecture allows fast and secure reach back from remote satellite terminals to customer resources and networks.

In addition to providing high capacity, full-spectrum service, Segovia complies with U.S. Government, Department of Defense (DoD) and international security standards, guidelines, and best practices. The Segovia solution is a secure, reliable platform for all IP traffic – supporting classified and unclassified networks. Segovia's historical network availability exceeds 99.9 percent.

(Insert Customer Name)

In the spirit of the Federal Acquisition Streamlining Act (ordering activity) and (Contractor) enter into a cooperative agreement to further reduce the administrative costs of acquiring commercial items from the General Services Administration (GSA) Federal Supply Schedule Contract(s) \_\_\_\_\_.

Federal Supply Schedule contract BPAs eliminate contracting and open market costs such as: search for sources; the development of technical documents, solicitations and the evaluation of offers. Teaming Arrangements are permitted with Federal Supply Schedule Contractors in accordance with Federal Acquisition Regulation (FAR) 9.6.

This BPA will further decrease costs, reduce paperwork, and save time by eliminating the need for repetitive, individual purchases from the schedule contract. The end result is to create a purchasing mechanism for the ordering activity that works better and costs less.
